

**EV Charging Service Provider YourStand Signs Distribution Agreement
with Global EV Charger Manufacturer Wallbox
~ Pre-Orders Start 11 April 2023~**

YourStand, a leading EV charging service provider in Japan (Headquarters: Yokohama, Japan/ CEO: Nobuyuki Ura) has signed a Supplier and Distribution Agreement with Wallbox (NYSE: WBX).

Why Partner with Wallbox

Most EV chargers currently sold in Japan for single family homes are large in size and have a low energy output of approximately 3kW, which means that it takes a considerable amount of time to fully charge an electric vehicle. In addition, few chargers have high level functions such as the adjustment of charging output and obtaining of charging data.

To provide EV users with a new option of smart EV chargers, YourStand has concluded a distribution agreement with Wallbox, which manufactures high quality chargers with adjustable output at reasonable prices. Pre-order for Pulsar Plus starts 11 April.

Features of Pulsar Plus

Pulsar Plus, Wallbox's best selling charger globally, will be the first to enter the Japanese market. Users can charge at 6kW(*1) or more, reducing the charging time by half, compared to the standard 3.2kW charging outlet used by many EV users.

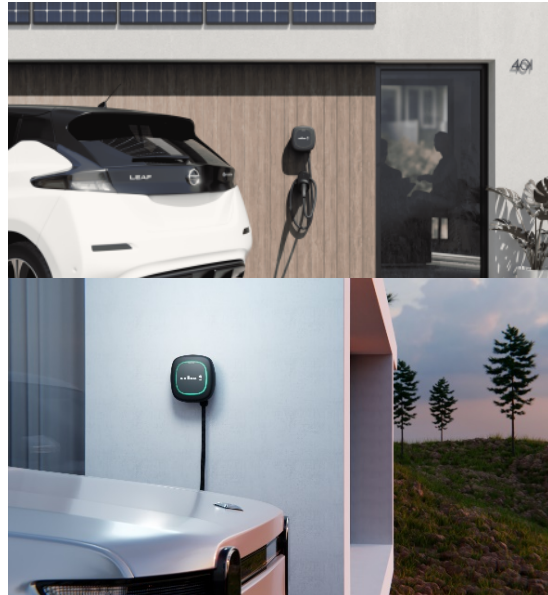

Pulsar Plus comes with a connected charging cable, reducing the hassle of having to store and bring out the cable every time.

Pulsar Plus weighs at around 2kg, which is the lightest 6kW smart charger available in the Japanese market. Its compact design makes it easy for users to install in their carparks, even within limited space.

In addition, Pulsar Plus comes with an Eco-Smart setting, which allows you to choose 100% solar energy or a mix of solar and grid energy, as well as a setting called Power Boost, which automatically adjusts the charging output in balance with your home utility to avoid power overload.

Wallbox is a global company with over 370,000 chargers sold in more than 112 countries. They are partners with automotive manufacturers and other major brands such as Iberdrola, Fisker, and Uber.

*1 Up to 8kW with Tesla EVs.

Specifications of Pulsar Plus

Rated Value: 200V Single Phase
Max Power: 6kW
Current Type: AC
Connectivity: Bluetooth, Wifi
Connector: J1772
Size (with cable) : 198mm x 200mm x 99mm
